

USER MANUAL

HD INSPECTION VIDEOSCOPE

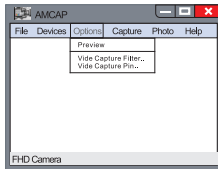

This is a USB 3.0 connection handheld high-definition video scope. It uses a high-definition camera with a probe diameter of 8.5mm/5.5mm and is equipped with a 80cm long, arbitrarily curved snake tube. Meanwhile, the camera is equipped with 8/6 high-brightness LED lights, which can help you detect places that are invisible to the naked eye in small and dark spaces.

The video scope can be widely used in industrial and domestic applications such as automobile inspection, pipeline inspection and machine equipment inspection. The handle is easy to operate and practical and it can bring great convenience to your work and life.

Connect PC operation

1. Before connecting, please make sure your PC supports Windows XP/Vista/7/8/10;
2. Open website: www.sz-ajjr.com;
3. Click on "APP Download" and click on "USB Endoscope Video Software", select local download, save the file;
4. Connect the USB interface of the video scope to the PC, and the LED light is on;
5. Double-click the file icon "AMCAP"  to pop up the operation window of the right figure;
6. Click on "Options" and click on "Preview" in the drop-down menu, displaying an image;

Connect the phone operation

1. Use the Phone (Android system) browser to scan the QR code on the right side, click "Always access", click "Download Now", save the file name as: an97.apk, click OK to download the APP (OTG SEE), and install it;
2. Connect the OTG cable to the USB plug of the handle, and connect the other end to the Android phone. (Open APP: OTG SEE) the image displaying.
